Summary

Final-year Software Engineering student at Hanoi University of Industry specializing in Frontend Development with **React.js, Next.js, TypeScript, and Tailwind CSS**. Experienced in building responsive, accessible web interfaces and integrating RESTful APIs, real-time WebSockets, and third-party payment gateways. Strong English proficiency with an **820 TOEIC** score for reading technical documentation and collaborating in professional teams.

Technical Skills

Frontend: React.js, Next.js, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Redux Toolkit, RTK Query, Formik, Yup
Backend & Database: Node.js, Express.js, MongoDB, Redis, Socket.io, RESTful APIs, JWT Authentication
Languages & Tools: JavaScript, TypeScript, C++, Java, Git, GitHub, Postman, Figma, Vite, Vercel, Render

Featured Projects

English LMS - Learning Management Platform | *Next.js, TypeScript, Tailwind CSS, RTK Query, Redis, Socket.io* Aug 2026 – Sep 2026

- **Solo Developer** | Live Demo | GitHub Repository
- Engineered a responsive multi-role e-learning interface using Next.js, TypeScript, and Tailwind CSS featuring dark and light themes alongside a dynamic CMS layout editor for hero banners, FAQs, and course categories.
- Implemented client-side data fetching and state caching with Redux Toolkit and RTK Query paired with Redis session caching to eliminate redundant network requests across page transitions.
- Built multi-step authentication and course management workflows using Formik and Yup validation, supporting 4-digit OTP email activation, social login, and role-based route protection via HTTP-only JWT cookies.
- Integrated Socket.io for instant admin notifications on new orders, course reviews, and Q&A discussions, complemented by a 12-month interactive analytics dashboard.

Self-Order Kiosk - In-Store Ordering & POS System | *React.js, Node.js, Express.js, MongoDB, MoMo API* Mar 2026 – Jun 2026

- **Lead Frontend & API Integration, Team of 3** | Live Demo | GitHub Repository
- Spearheaded the frontend architecture and business logic refactoring to transform a food-delivery application into a touch-optimized in-store self-ordering kiosk for both walk-in guests and registered members.
- Developed core ordering interfaces including category filtering, real-time cart synchronization, and automated checkout flows integrated with MoMo QR payment.
- Constructed an admin sales dashboard to monitor daily order statuses, revenue metrics, and menu inventory.
- Designed and tested over 20 RESTful API endpoints using Postman collections to ensure consistent payload validation and error handling between React clients and Express controllers.

Interactive Developer Portfolio | *React 19, TypeScript, Vite, Tailwind CSS v4* Oct 2026 – Nov 2026

- **Solo Developer** | Live Demo | GitHub Profile
- Designed and built a high-craft personal portfolio utilizing React 19, TypeScript, and Tailwind CSS v4 with a responsive Bento grid layout and glassmorphic UI components.
- Programmed custom pointer-tilt 3D perspective physics, magnetic button micro-interactions, and scroll-triggered reveal animations using the IntersectionObserver API without external animation libraries.
- Embedded an in-app PDF resume preview modal and enforced accessibility compliance via prefers-reduced-motion media queries.

Education

Hanoi University of Industry Hanoi, Vietnam
Bachelor of Engineering in Software Engineering *Sep 2023 – Expected Jul 2027*

- **Relevant Coursework**: Web Programming, Object-Oriented Programming, Data Structures and Algorithms, Database Management Systems, Software Engineering.

Languages & Certifications

English: Strong command of technical documentation and professional communication; currently preparing for IELTS Academic.
Chinese: Completed HSK 3 Coursework.
